

Teresa Update #11

Hi Family and Friends,

To get you up to date, Teresa was discharged from the Rehab Hospital on March 10th, and returned to her own home. Since that time, she has been getting reacquainted with her pets (dog and cat), and with her friends! She will be having home health care for awhile, which will include home physical therapy and home occupational therapy. The people from the home health agency are very knowledgeable about stroke care, and are encouraged by what Teresa is already able to do. They feel that she will continue to make progress. Eventually she will “graduate” to having therapy on an out-patient basis back at the hospital. In between the home health visits, Teresa and Barb have their own “therapy routines”.

We hope you all realize how your prayers and cards have helped in her recovery process.

Jerry and Barb

“Faith is being sure of what we hope for and certain of what we do not see”.

Hebrews 11:1
