

Teresa Update #6

On Thursday, Teresa moved to Candler Hospital In-Patient Rehabilitation Unit to begin the hard work of rehab. On Friday, she met with the Occupational, Physical, and Speech Therapists, who have formulated a plan just for her. The Rehab unit has a "Gym", which has all types of exercise equipment, parallel bars, etc, and also a kitchen, laundry room, living room, and more, so that they can evaluate her abilities doing what she would normally do in her home.

The visiting hours here are 11am to 5pm; shorter, so that the patients have plenty of time for therapies as well as rest periods. Just as at Memorial Hospital, she has great staff to help her. Her appetite has improved; her speech is almost "back to normal", except when she is tired; she is able to do a little more with her right leg. Her spirits are good, and she is trying SO hard. We surely appreciate all of your prayers. Please pray specifically for movement and strength in her right arm and hand.

Hugs,

Jerry and Barb
